---	-----------

WHAT'S NEW IN MINDMANAGER 2016 SERVICE PACK 1

Zapier

- Integrate MindManager with Zapier and send selected map data to over 500 other applications, including project management tools such as Trello, Basecamp, and Asana.
- Develop project maps in MindManager, then Zap tasks and topics data, generate emails, or create Google documents to share with your team.
- Zap a variety of map topics data, including: topic and subtopic text, resources, tags, priorities, start and due dates, progress, notes, tags, links, and milestones.

Synchronize Resources with SharePoint

- Add a SharePoint site to MindManager, and the list of all SharePoint users on that site is automatically added to MindManager's resource list.
- Create a task and quickly and easily assign it to a SharePoint resource.

Improved User Experience

- Add flowchart topics in four directions (left, right, above, or below) for greater flexibility.
- Use MindManager's crisp new interface layout and icons, which comply with Microsoft Windows 10's interface standards.
- Add resources directly from the Ribbon interface, and show or hide over-and underutilized resources from the task pane.
- Disable filtering on selected topics to have more control over what does, and doesn't display on your map when you use a filter. Topics "ignored" by filters are listed in the Map Index, in the Elements tab.

WHAT'S NEW IN MINDMANAGER 2016

New Diagramming Capabilities—Flowchart, Concept Maps & More

- Create network and IT systems diagrams, engineering workflows, business process flowcharts, and other step-by-step illustrations, using new templates and diagram tools.
- Includes new, commonly-used flow chart topic shapes.
- Drag-and-drop topic shapes, decision topics, and line annotations makes creating flowcharts and other diagrams simple.
- Add notes, attachments, icons, tags, and other content to provide context. You can also filter, index, and search—so you can always find what you need.

New Multi-Monitor Support

- MindManager 2016 for Windows offers multi-monitor support, allowing you to work with MindManager maps on two (or more) monitors.

New MindManager Reader

- Offers full compatibility with current MindManager Maps, including new Flowchart and Concept Maps.
- Present a Map using Walkthrough mode.
- Utilize Search, Marker Index, and Filters to easily locate and display desired information.
- Available as both an executable and admin MSI in English, French, and German.

New Share Options on the Home Tab

- Easy access to the most popular Send and Export formats.

New Microsoft Office 2016-style Ribbon

- The Ribbon interface has been updated to match the look and feel of Microsoft Office 2016, including updated White, Colorful, and Dark Gray Themes.

New Custom Tag Colors

- Assign custom tag colors to any tags in the Map.
- Quickly differentiate tags at a glance.

New Subtopic Counter

- MindManager now displays the total number of subtopics in collapsed topic branches.

Redesigned Icons Markers

- Progress and Priority icons are now bolder and brighter in all maps.
- Completed Task Markers are now displayed in green.
- All default Map Index markers have been redesigned with improved anti-aliasing.

Improved Topic Information Visual Design

- Customize the tag and task info background and font colors to match the look and feel of any map.
- Improved user interface displays topic information icons.

Meeting Jetpack Now Included

- Meeting Jetpack Templates, Map Parts, and Images are now a standard feature of MindManager.

Improved Backstage Experience

- Similar functionality has been grouped for improved discoverability.
- File > Open now also contains Recent Maps.
- File > Share now contains both Export and Save & Send functions.
- Improved Save As experience lets you easily choose desired file type.

SharePoint Linker Now Built-in and New Support for Office 365 SharePoint Online Instances*

- Query Documents, Tasks, Calendar Items, Images, and Issues.
- Create Tasks in MindManager and send to SharePoint.

*SharePoint Linker is available in MindManager 2016 Enterprise Edition *only*.

RESOLVED ISSUES IN VERSION 16.1.193

General Usability

Issue:	When exporting auto-created slides to .txt or .html files, only the central topic is saved.
Resolution:	Auto-created slides can be exported correctly to .txt or .html files.
Issue:	Links added to a topic that includes the “#” character do not open the internal MindManager browser, but will work with an external browser.
Resolution:	Links can be opened in both the internal MindManager browser and an external browser.
Issue:	Hiding tag group names does not work correctly.
Resolution:	Selecting Hide >Tag Group Names means tag group names do not display.
Issue:	In the Font dropdown menu on Home or Design tab, the complete list of fonts in does not scroll down correctly.
Resolution:	Full font list displays correctly in dropdown and is accessible using scroll bar.
Issue:	Detached map loses focus after exporting a task.
Resolution:	The map on the detached tab remains as the active window.
Issue:	Wrong current fill or line color displayed in the “More Colors” dialog.
Resolution:	Correct current fill and line colors displayed.
Issue:	The date picker does not close after using the scroll buttons for “month.”
Resolution:	Date picker closes correctly.
Issue:	When sending a project from Microsoft Project to MindManager, the send process crashes Microsoft Project during the “Priority” editing process.
Resolution:	Editing the project’s priority during Send to MindManager does not crash Microsoft Project.
Issue:	MindManager crashes when creating slides.
Resolution:	Slides can be exported without crashing MindManager.
Issue:	In Power Filter, the Milestone checkbox remains checked after clicking the “Clear” link.
Resolution:	After clicking the “Clear” link, the Milestone checkbox returns to its default unchecked state.
Issue:	Custom topic shapes appear too small.
Resolution:	Custom topic shapes correctly sized.

Issue: Moving topics when roll-up and dependencies are assigned to any of the topics causes MindManager to crash.

Resolution: Moving topics with roll-ups and dependencies does not crash MindManager.

Issue: When using Mindjet tasks, changing the project start date does not adjust the associated tasks.

Resolution: Moving a project date forces an adjustment to all associated task dates.

Flowcharts

Issue: Flowchart topics do not move with the arrow keys.

Resolution: Arrow keys can move flowchart topics.

Issue: Flowchart relationships and other tags embed in topic frame and cannot be selected.

Resolution: Tags and relationships appear outside the topic frame and can be selected.

Issue: Changing the shape of a flowchart topic alters the map alignment.

Resolution: Map alignment remains unchanged when flowchart topic shape is changed.

Issue: Large flowcharts fail to display topic items at the lower edge of the map when filtered.

Resolution: All unfiltered items now display.

SharePoint

Issue: Rolled up task does not include SharePoint topic progress when multiple topics are present and contain start and end dates.

Resolution: SharePoint topic progress is included.

Issue: If more than one resource is added to a task in SharePoint, the resource tag returns incorrect information.

Resolution: The resource tag correctly identifies all assigned resources.

Issue: When using SharePoint tasks, moving a project date does not ripple through to the associated tasks.

Resolution: Moving a project date forces an adjustment to all associated task dates.

MindManager Reader

Issue:	No Zoom In and Zoom Out icons in MindManager Reader view tab drop down.
Resolution:	Zoom In and Zoom Out icons present.
Issue:	Incorrect prompt regarding relative links in relocated MindManager Reader map.
Resolution:	Prompt no longer displays.

RESOLVED ISSUES IN VERSION 16.0.152

General Usability

Issue:	Analytic View add-in does not work with MindManager 64-bit.
Resolution:	Resolved.
Issue:	Numeric topic properties are incorrectly aligned left.
Resolution:	Numeric topic properties are correctly aligned right.
Issue:	Removing task info does not remove Effort tag.
Resolution:	Effort tag is removed when task info is removed.
Issue:	Gantt chart columns have to be resized each time the Gantt View is opened.
Resolution:	Gantt chart columns no longer have to be resized.
Issue:	Copying text and spaces from Topic Notes to other applications is pasted with incorrect formatting.
Resolution:	Formatting is preserved.
Issue:	Windows Search does not work with 32-bit MindManager on 64-bit Operating Systems.
Resolution:	Windows Search works with 32-bit MindManager on 64-bit Operating Systems.
Issue:	MindManager stops working if formatting is applied in the Theme Editor without first selecting a style group.
Resolution:	Resolved.
Issue:	Outlook Add-in does not work with IMAP accounts with Outlook 2013 and 2016.
Resolution:	IMAP support has been improved.

Issue: High memory utilization present when editing a Map that contains a large number of topics with formulas.

Resolution: Better memory handling has been implemented.

Task Management

Issue: Mindjet Tasks icon is not removed if Task information is disconnected from Mindjet Tasks.

Resolution: Mindjet Tasks icon is properly removed.

KNOWN ISSUES IN VERSION 16.1.193

Issue: Table of Contents does not display in online Help when using Windows 10.

Workaround: Local Help is enabled by default. Online Help can be manually enabled in MindManager File > Options.

Issue: The 64-bit MindManager crashes when editing RSS feeds.

Workaround: Use the 32-bit version of MindManager.

Issue: Refreshing a SharePoint query fails if the map is stored in Mindjet Files.

Workaround: Save the map locally.

Issue: Renaming a calculated property creates a new calculated property.

Workaround: Right-click the calculated property topic and select Modify Topic Properties. Then rename the calculated property in the Formula Editor.

Issue: Querying a SharePoint calendar item for “today’s date” does not return any results.

Workaround: Query for “yesterday’s date.”

Issue: MindManager occasionally crashes when adding an Excel Linker Map Part.

Workaround: None.

Issue: MindManager stops working during certain tutorial options if the Insert and Home ribbon tabs have been hidden.

Workaround: Unhide ribbon tabs.

Issue: MindManager stops working when dragging-and-dropping more than 6 Outlook items onto a flowchart.

Workaround: Drag Outlook items in groups of <6.

Issue: In the Save as dialog, options are offered to save a flowchart into an HTML, PowerPoint, or OPML format, but these options are not available for flowcharts.

Workaround: Do not attempt to save as .html, .ppt, or .opml.

Issue: When “Reopen last open local maps on startup” is enabled in File > Options > General, the most recent open map does not reopen after MindManager launch.

Workaround: Last open local map should reopen when MindManager is launched.

KNOWN ISSUES IN VERSION 16.0.152

Issue:	Flowchart shapes and Relationship labels do not export properly to Mindjet Viewer Format.
Workaround:	Use an alternative export, such as Save as Image to share your content.
Issue:	Detached map loses focus after completing an export.
Workaround:	Refocus on the detached map after export completes.
Issue:	Detached map loses focus when hovering over “Close” button in Notes pane.
Workaround:	Close Notes pane by using keyboard shortcut Control + T .
Issue:	The Database Linker cannot connect to the Sample Database in the 64-bit version of MindManager.
Workaround:	N/A.
Issue:	Message that Java is not installed appears when exporting a map to the Mindjet Viewer and a 64-bit version of Java is installed.
Workaround:	Install the 32-bit version of Java.
Issue:	Formula does not recalculate while co-editing with earlier versions, or the web version.
Workaround:	The formula recalculates when the user of Version 14 updates the map (e.g. adding a topic, changing a property value).
Issue:	Crash occurs when trying to connect to Outlook when Outlook is installed but not configured.
Workaround:	Setup and launch Outlook before attempting to use the Outlook integration.
Issue:	Proxy settings may cache while the desktop app is opened. If new, incorrect credentials are added, the app will use the earlier, validated credentials.
Workaround:	Close the desktop app to remove the cached credentials and prevent unauthorized access.
Issue:	Connection drops and errors occur when a large amount of topics (e.g. 200+ topics) are sent to Mindjet Tasks.
Workaround:	Send the topics in smaller groups.
Issue:	Flowchart topic shapes and lines are only supported in MindManager 2016 for Windows.
Workaround:	Use standard map topic shapes: rounded rectangle, rectangle, line, no line, hexagon, octagon, oval, or circle.
