# MINDMANAGER BROWSER APPLICATION VERSION 2.1

## General Information

- The MindManager Browser application leverages the rich interactive format available in MindManager. Experience mmap files as animated presentations, expand and collapse branches, view rich content like notes, attachments, links, comments, and more (see the Supported features section for more info).
- The user interface supports English, French, German, Russian, Simplified Chinese, and Japanese. The language will be selected based on the system's language settings. Map content will appear in the language used to create it.

## New in Version 2.1

Version 2.1 adds bug fixes and quality of life enhancements

- Supplemental content like notes, links, etc. displayed in Presentation Mode is now highlighted when stepping through the presentation if displaying the content is enabled in the settings.
- Focus button now has animated panning.
- Publishing
  - Customize the branding for your published files
    - The MindManager logo displayed on the loading page and bottom right of the screen can be customized in the published files advanced options
    - The logo link can also be customized to hyperlink to your website of choice
  - The MindManager trial now includes trial access to the publishing service. Files published during the trial are automatically unpublished after 30 days.
  - Count of views is displayed for each file on the Manage Published Maps screen.
  - The published file's title is displayed on the password input screen for password protected files.
  - Publish preview loads much faster.
  - Publishing a filtered map now correctly honors the filter in the published file's presentation mode.
  - Set it and forget it, changes to advanced options are now always applied to newly published files (includes: allow downloads, display in presentation mode, storage location, and custom branding settings)
- Mobile
  - Tap and drag anywhere to pan the map (even on top of topics)
  - Pinch and zoom anywhere on the map (even on top of topics)
  - Size of collapse/expand buttons and control strip icons on mobile now match original map size.
  - Mobile content inspector has a new UI and now resizes based on content height.

- Password screen for files published with a password has been optimized for mobile.
- UI can no longer be accidentally scrolled up on Mobile Safari.
- Localization
  - Several localization errors have been fixed.
- Layout
  - Layout engine has been improved improving accuracy of display in the following areas: floating topic location, background object location, custom main topic positioning, rich text formatting, connector line styles, line anchor styles, distance between siblings, distance from parent, nested layouts, relationship lines, and floating timelines.
  - Most layout fixes do not appear in the “Fixed In” section of this document due to their detailed nature.
