Resolution:	Fixed.
Issue:	“Send to Task” not working if the port number is in the URL
Resolution:	Fixed.
Issue:	Task info refresh button is refreshing the entire map
Resolution:	Fixed.
Issue:	SharePoint 2013 multiple file edits are possible.
Resolution:	Fixed.
Issue:	“Requires Adobe Flash Player” message appearing for users who already have Adobe Flash Player
Resolution:	Fixed.
Issue:	JavaScript error when creating new maps in SharePoint 2010 compatibility mode in SharePoint 2013
Resolution:	Fixed.
Issue:	Cannot create a new map from templates using SharePoint 2013
Resolution:	Fixed.

Known Issues

Known Issues – Web Clients

Issue:	When using the MindManager Server browser editor, there is a time lag when updating SharePoint topics.
Workaround:	When updating SharePoint topics, wait for the sync to complete before updating the next topic. Verify a completed sync by watching the “Refresh” icon: the icon will “gray out,” then return to normal color once the topic update is completed.
Issue:	iFilter is not able to search the content of maps on SharePoint 2013
Workaround:	None
Issue:	Internet Explorer 11 may present a message that Flash version 10 or above is required (even if the version is already installed).
Workaround:	Adding the domain to compatibility view allows you to open the map.
Issue:	Query results disappear when they’re created in MindManager for Windows using the Linker for SharePoint and opened on the SharePoint 2013 server via a browser.
Workaround:	Working with one client (e.g. Desktop or Browser) will avoid this issue.

Known Issues – Windows Users

Issue:	In certain setups, Internet Explorer® 9 users who check out a .mmap file, then click the offered link to open the file will be prompted to download and save the map locally rather than open it in the browser.
Workaround:	To open the map directly into the browser, highlight the file, and select View in Browser .

Issue:	If a topic with an embedded image is sent to a SharePoint task, the image will be removed from the topic.
Workaround:	None

Known Issues – Mac Users

Issue:	Mindjet for Mac users are not able to open .mmap documents from SharePoint using the Edit in Mindjet desktop option in the SharePoint context menu.
Workaround:	Download the map from SharePoint, then open the downloaded map in Mindjet for Mac.
Issue:	Using either the scroll wheel or the track pad will scroll the map, not the SharePoint page.
Workaround:	Use the scroll bar on the side of the page.
