WHAT'S NEW IN MINDMANAGER 12 for MAC

NEW Objects & Smart Shapes

Shapes direct attention and enable understanding in a way words never can - and we've added 12 powerful new shapes to our object library. Group topics or process parts within shapes to distinguish areas of importance, or combine customizable shapes and Smart Shapes to build new templates and diagram types that support your unique objectives.

- Enrich, clarify and expand map content with 12 new shapes including stars, arrows, brackets, funnels and many others
- Easily group content within shapes to define processes, illustrate concepts and more
- Create custom diagrams quickly and easily with new smart funnels & matrices

NEW SmartRules™

SmartRules™ extends and goes beyond mapping, empowering you to automatically trigger changes not only in topic look and feel, but actual topic data. It helps reduce repetitive tasks and transform maps from simply representing your processes and workflows, to driving and accelerating them.

- Write rules that change topic icons, tags, properties, progress & priority markers, based on specific triggers
- Apply SmartRules to individual objects or topics, select branches or full diagrams
- Automate content updates to task lists, project plans, flowcharts and more, saving time and igniting productivity

Expanded Theme Designs

First impressions influence everything that follows. Our new visual themes feature fresh colors, modern fonts and personality-packed designs that set an immediate tone for your presentation, and instantly convey subtle yet significant messages about your brand, style, and content.

- Choose from 40+ stunning new visual themes, from polished to whimsical to dramatic
- Transform any map's look, feel and tone with a single click
- Effortlessly switch themes to engage different audiences and support different goals

New Icon Library

- We have expanded and enhanced the icon library and added 500+ new and enhanced icons
- The Icons option is now included in the Library drop down list, making it easier for users to find and insert icons

Enhanced HTML Export & Publish Filtering

Improved communication & collaboration by making shared maps easier for recipients to navigate, understand, and respond to

- Exported and Published Map can now be filtered based on icons, tags, resources and saved filter
- Publishers can also now create a direct topic link from the output to visually guide recipients to specific content

macOS specific enhancements

We also have added a couple of macOS specific enhancements:

- Touch Bar Support
- Dark Mode Support*

*Requires macOS 10.14 Mojave or greater

New Imports

Users can now import existing XMind & FreeMind maps into MindManager. Imports enable users to evolve and improve on the content created in other mapping applications leveraging the breadth of MindManager tools and features.

- XMind Import
- FreeMind Import

WHAT'S NEW IN MINDMANAGER 12.1.200 for MAC

Support for macOS 11 Big Sur

- MindManager 12 for Mac is now fully supported on new macOS 11 Big Sur.

WHAT'S NEW IN MINDMANAGER 12.1.190 for MAC

Support for macOS 10.15 Catalina

- MindManager 12 for Mac is now fully supported on new macOS 10.15 Catalina.

Improved experience of creating linked map

- Issues related to sending topic as New Linked Map has been resolved.

SYSTEM REQUIREMENTS FOR VERSION 12.1.190

- Mac OS X 10.13 (High Sierra) to 10.15 (Catalina)
- 250 MB available disk space
- 1024 x 768 or greater display resolution
- Additional requirements for certain features:
 - Broadband Internet Connection

RESOLVED ISSUES IN VERSION 12.1.190

General Mapping:

Issue: Sending a topic as New Linked Map is not providing default name to the new map.

Resolution: Fixed. Name of the New Linked Map would be same as topic text of selected topic.

Issue: Sending a topic as New Linked Map results into broken links between both maps.

Resolution: Fixed. Selected topic and New Linked Map will have links to navigate between both maps.

Issue: Topic content is not saved when sending a topic as New Linked Map.

Resolution: Fixed.

KNOWN ISSUES IN VERSION 12.1.190

General Mapping:

Issue: Map cannot be saved directly to Mindjet Files using file “Save as” dialogue.

Workaround: User will need to save the map locally first and then upload it to Mindjet Files using Mindjet Files option inside File menu.

Issue: Template, Theme and Map Parts cannot be saved directly to default directory inside Application Support.

Workaround: Manually navigate to respective folders located at Macintosh HD > Users > UserName > Library > Application Support > Mindjet > Mindjet MindManager > 12 > English > Library > Choose the folder you are looking for and save.

RESOLVED ISSUES IN VERSION 12.1.183

General Mapping:

Issue: “Bold & Italicize” font controls cannot be applied to individual words inside topic text.

Resolution: Fixed.

Issue: In notes, hyperlink replaces selected text using the Insert menu.

Resolution: Fixed. Selected text is converted into hyperlinked text.

RESOLVED ISSUES IN VERSION 12.1.177

General Mapping:

Issue: Quick add handles are still displaying after deselecting "Show Topics Quick Add Handles" in MM preferences.

Resolution: Fixed. Quick Add handles can now be disabled.

Issue: Borders are not placed correctly inside print preview dialog, which results in the Header and Footer to not print.

Resolution: Fixed.

Issue: Default boundary styles cannot be set.

Resolution: Fixed. Choose a specific boundary style then go to Format menu and choose “Set as Default Format”.

Issue: The 'Show fill color gradients' option in MindManager preferences is not working.

Resolution: Fixed.

Issue: Keyboard Shortcut to enter Decision topic is not working in Flowchart and Concept maps.

Resolution: Use Cmd+Enter to insert Decision topic.

Issue: Text Box object is not resized automatically to accommodate long text.

Resolution: Fixed.

Issue: Additional Progress and Priority icons are named as "Marker Name" by default in the inspector.

Resolution: Fixed.

Issue: Keyboard navigating using the arrow keys is not working in the Free Form map layout.

Resolution: Fixed.

Issue: Mixed Font color displays after applying certain map themes.

Workaround: Fixed.

macOS Dark Mode:

Issue: Text cursor disappears while editing text inside the topic when Dark Mode is enabled.

Resolution: Fixed.

Issue: Footer text is not visible when printing in dark mode.

Resolution: Fixed.

Issue: Toolbar button Hover state is not consistent when in Dark Mode is enabled.

Resolution: Fixed.

Filters:

Issue: Topics matching filter criteria are not properly filtered when “Match: all” condition is applied.

Resolution: Fixed.

Issue: All topics with different tags are not filtered when "Any" condition is applied.

Resolution: Fixed.

Issue: Subtopics that do not match filter criteria are not hidden when using Show option.

Resolution: Fixed. Subtopics are now properly hidden.

Miscellaneous:

Issue: Map changes cannot be saved if XMind was installed prior to installing MindManager.

Resolution: Fixed.

Issue: Notes in XMind files are not imported when converting the diagram to a MindManager file.

Resolution: Fixed.

Issue: macOS system notification indicating MindManager is not optimized for 64-bit operating systems may pop up from time to time.

Resolution: Fixed.

Issue: Sending a topic, that has relative link, as “New Linked Map” results in broken link.

Resolution: Fixed.

Issue: Unable to add or update property value after adding property to a topic.

Resolution: Fixed.

Issue: Unpublishing a map may fail when Unpublishing via the publish context menu.

Workaround: Fixed.

KNOWN ISSUES IN VERSION 12.1.177

SmartRules:

Issue: Rules containing identical triggers or effects can be entered, which may cause conflicts.

Workaround: Create SmartRules with unique triggers and effects.

Issue: After applying a Topic Style as an effect, the topic shape cannot be changed.

Workaround: None.

Mapping:

Issue: Topic content is not saved in the new map that is created while sending topic to New Linked Map.

Workaround: Save the newly created linked map again before closing it.

Issue: Unable to set default format for relationship.

Workaround: None.

Filter:

Issue: Unable to filter map based on tags inside General Tags group.

Workaround: Create a new tag group, re-tag topics with tags from that group and then apply the filter.

Issue: Callout topics which do not match filter criteria are filtered.

Workaround: None.

Properties:

Issue: In pre-filled templates, the currency type in formulas cannot be changed.

Workaround: None. In MindManager 12 for Mac, formulas are recalculated when property values change but cannot be defined or modified.

Issue: Unable to add properties to multiple selected topics.

Workaround: Apply properties to topics individually.

Issue: Properties cannot be hidden on a topic when added as an effect through SmartRules.

Workaround: None.

Miscellaneous:

Issue: MindManager stops responding while moving a map that is currently open to new folder.

Workaround: Close the map before moving the file.

Issue: Image object dimensions are not displayed when resizing an image.

Workaround: Open format object dialog by right clicking the image object and adjust the height and /or width.

RESOLVED ISSUES IN VERSION 12.0.161

General Mapping:

Issue: Tag with same name belonging to different tag groups is not properly added to the topic.

Resolution: Fixed.

Issue: Zoom controls are not always visible when viewing large maps.

Resolution: Fixed.

Issue: Unable to drag and drop Map Parts from the task pane.

Resolution: Fixed.

Task Management:

Issue: Holidays are ignored while adding task information.

Resolution: Fixed.

Issue: Removing the start and end date of a dependent task should remove any dependency on that task.

Resolution: Fixed

Objects:

Issue: Unable to move multiple selected objects.

Resolution: Fixed.

Issue: Unable to insert text immediately after adding a Text Box.

Resolution: Fixed.

Issue: Unable to see the selection frame while hovering over an Object

Resolution: Fixed.

Issue: Transparency value of shapes is reset to 100% while updating fill color from the format task pane.

Resolution: Fixed.

Miscellaneous:

Issue: MindManager for Mac may crash when opening maps in Mindjet Files.

Resolution: Fixed.

Issue: Map Themes cannot be applied to Flowchart diagrams.

Resolution: Fixed.

Issue: MindManager for Mac crashes while using the 'Find' feature in Flowchart maps.

Resolution: Fixed.

Issue: MindManager for Mac crashes on double clicking a topic while Format menu is expanded.

Resolution: Fixed.

Issue: MindManager for Mac crashes while moving a topic with large attachments.

Resolution: Fixed.

KNOWN ISSUES IN VERSION 12.0.161

SmartRules:

Issue: SmartRules are not applied to recovered maps if MindManager crashes.

Workaround: Save, close, and reopen the Map.

Issue: Unable to insert topic inside Shapes or Smart Shapes using mouse double-click.

Workaround: Lock the objects by right clicking the Background and insert or drag & drop the topic from mapping canvas.

Mapping:

Issue: Mixed Font color displays after applying certain map themes.

Workaround: Use Copy/Paste Format feature to update all fonts to be the same color.

Issue: Topic text is appearing cropped when markers are added after applying Match Width.

Workaround: Change affected topics back to Automatic Topic Size (Found in the Inspector Under Format/Style) then use the Match Width command on those topics again.

Dark Mode:

Issue: While MindManager is open and switching from Light Mode to Dark Mode, users may see User Interface issues.

Workaround: Restart the application.

Properties:

Issue: Missing validation while entering property values.

Workaround: Enter the value depending upon the type of property.

Issue: Minor usability issues while adding options for 'List' type property.

Workaround: Click on List options field to add the options and press return key to accept the value.

Miscellaneous:

Issue: Fonts may appear blurry on lower resolution displays or when the map is zoomed out.

Workaround: Zoom in on the map.

Issue: Revision Number and Modification Date are truncated when enabled from Show/Hide Menu.

Workaround: None.

Issue: Date format is not showing correctly when exporting to Word.

Workaround: None.

Issue: Unpublish may fail when unpublishing via the publish context menu.

Workaround: Clear browser cache & cookies in Safari and restart MindManager.
