WHAT'S NEW IN MINDMANAGER FOR MAC 13

NEW! Gantt and More

New tools for project managers

Gantt charts are widely used by project managers for the detail and visibility they provide. We've added Gantt functionality and many more new project management features into MindManager for Mac to easily plan, coordinate, and execute your projects.

- Add, edit, and view project elements, and track general project costs within Gantt view
- Easily adjust your view based on project size or timeline
- Move projects, remove slack time, roll up tasks, view critical paths, set milestones, and more

NEW! Project Cost Tracking

Get a more complete project picture

Whether your project budget is massive or modest, keeping costs in sight is the key to successfully managing it. Our new Project Costing tool lets you quickly add individual costs into your project maps, easily update them, and sum totals with a simple click, for instant visibility into one of your project's most critical elements.

- Define and view general costs and resource costs within maps
- Tailor maps for budget-focused conversations by rolling up costs
- Manage exceptions and ensure budget adherence by creating SmartRules that trigger when costs exceed set amounts

NEW! Tag View

Keep your projects on track

Projects succeed when they stay in forward motion. Tag View gives you a clear picture of a project's overall progress towards completion, and where each individual task is in the process, so you can make the right changes to keep things on track and on time.

- See and update the status of tasks & action items in a progressive, Kanban-style columnar view
- Instantly identify backlogs, bottlenecks, and resource issues
- Define processes with custom column tags that are automatically applied in Map View

NEW! MindManager Snap

Snap up great content the moment you find it

Inspiration and ideas can show up at any time. With MindManager Snap, you'll be ready to grab them! Capture map-worthy content in seconds when you're away from MindManager, then drop it into your maps the next time you open it up — so no on-the-go brainstorm or 2 a.m. 'aha!' ever slips through the cracks.

- Capture images, links, and text notes any time, from anywhere, through your Chrome browser or mobile device
- Expand, enrich, and improve your maps in exciting new ways
- Snapped content stays safe and secure in a cloud-based queue until you're ready to add it to your map

MindManager Snap Chrome extension available in the Chrome Web Store

Capture via mobile device requires the MindManager Go mobile app

NEW! MindManager Go

Take your maps places your Mac can't go
Your thinking doesn't end when you walk away from your desktop. Now your maps don't either. Our fully-redesigned MindManager Go mobile viewer app lets you review, show, discuss, and even capture content for your maps anywhere and anytime you want to.

- View and navigate MindManager maps on your iPhone or iPad
- Filter maps on tags, icons, priority & progress to easily focus on the information you need
- Send images and text notes to your MindManager desktop with the NEW MindManager Snap capture tool

Available for download in the Google Play and Apple App stores

NEW! Tools for Mac

Built natively for Mac users
Mac and Windows machines are not created equally. That's why we've created this version with Mac users in mind. In addition to our existing Dark Mode option, MindManager for Mac now comes with added enhancements.

- Store your maps and access them from anywhere using your **iCloud** account
- Extend or mirror your desktop on your iPad for meetings and presentations with **Sidecar support***
- **Touch Bar** support now includes tag functionality

*Requires macOS 10.15 Catalina or greater

ENHANCED Flowcharting Tools

Keep processes flowing smoothly
Clear, well-defined processes lead to smooth, glitch-free workflows. Our new flowcharting enhancements enable you to quickly build visual flows that bring shape and clarity to complex processes, are easy for others to understand and follow, and are easily adapted as needs change.

- Define topic relationships clearly with improved relationship control and styling
- Work more efficiently with improved line placement precision
- Ability to add multiple lines coming out to/from a topic

ENHANCED Visualization & Productivity Tools

Make a bigger impact faster
It's now easier than ever to build and navigate MindManager maps and diagrams, bringing greater value to your day, work, and world.

- Make your diagrams richer and more engaging with **NEW image thumbnails**
- Better manage and make sense of complex maps with powerful **NEW sorting** capabilities
- Improve project management efficiency with **NEW resource management** options
- Quickly access most-used key features and functions with **IMPROVED ribbon control**
- Organize and update topics fast & intuitively with **IMPROVED drag & drop** functionality
- Manage your diagrams more effectively with **IMPROVED Shapes and Smart Shapes**
- Automate and accelerate even more with **EXPANDED SmartRules**

Known issues in MindManager for Mac 13.2.204

Issue: Unable to add floating topic on a published map when context menu of publish overlay is open

Workaround: Users will have to double click one more time to insert a floating topic.

WHAT'S NEW IN MINDMANAGER FOR MAC 13.2.132

NEW! MindManager License Server

With the MindManager Mac 13.2 update, we are enhancing our connected cloud experience and adding account capabilities. The MindManager license server is an administrative control mechanism that gives end-users and enterprise administrators more visibility into, and simplified direct control over, license and account status and activity. This will require users to register an account to sign into the product. Registration requires an email address and a password.

The implementation of the license server will enable the option for MindManager users with an account to expand their usage across the entire ecosystem of MindManager products, including multi-user MindManager Snap, MindManager for Microsoft Teams, and future MindManager products.

Benefits for MindManager single-license users:

- Potential for a broader range of product offerings to meet your needs and budget
- Direct access to your account to view status, manage services, make updates, and request support
- Up-to-the-minute product updates throughout your license term

Benefits for enterprise administrators:

- Expanded and simplified control over license distribution and management via the Admin Portal
- Greater visibility into usage via the license server analytics & reporting capabilities

ENHANCED! MindManager Snap

Discover new personal and collaborative ways to capture, receive, and share content any time, from anywhere, through your Chrome browser or mobile device. NEW multi-user MindManager Snap allows users to create and manage Snap Queues with peers and defined groups of individuals.

- Create a peer-to-peer or multi-user Snap Queue by inviting or adding other users
- Collaborate more effectively by sending and receiving content with other users in your shared Snap Queues
- Continue to enjoy the benefits of snapping up content to your own personal Snap Queue.

RESOLVED ISSUES IN VERSION 13.1.115
