WHAT’S NEW & ENHANCED IN MINDMANAGER 23.1

- **NEW** Jira integration*
  - Foster team alignment and keep projects on track with the new MindManager Jira integration. Directly connect your Jira Cloud and Jira Data Center instances to import and manage tickets and issues within MindManager. Explore and filter imported data, apply calculations, set up MindManager SmartRules, and make edits to individual or multiple tickets seamlessly through the MindManager interface. *Available separately as a paid add-on

- **NEW** Sticky note topics.
  - The addition of new sticky note topics offers customers a fresh way to visualize ideas and invigorates brainstorming. It enables seamless collaboration for both simultaneous and asynchronous teamwork. Users can easily retain their preferred sticky note styles and formatting for future use. Additionally, whiteboarding templates now feature sticky note topics as the default option when suitable.

- **NEW** Whiteboard template
  - Collaborate in real time or asynchronously across an expansive canvas. Brainstorm and plan with sticky note topics. Convert sticky notes into tasks with due dates and assignees. Combine diverse diagram types. Attach files, links, icons, images, and tags to enhance your workspace.

- **NEW** MindManager Files
  - MindManager has introduced integrated cloud file storage for saved maps, streamlining the process of saving and sharing files. The need for third-party storage is eliminated and it enhances the co-editing experience. Sharing maps for simultaneous and asynchronous collaboration is now achieved with a couple of clicks. All files originating from MindManager Web and MindManager Chromebook are automatically stored in the designated "MindManager Files" location.
- **NEW** Activity Digests
  - Get real-time updates on relevant MindManager activities when co-editing is enabled. Receive email digests when others edit or view your shared maps. These digests detail map edit specifics, conveniently delivered to your inbox. Easily interact with digests and quickly access settings directly from the email.
  - Customize alert frequency and content types from your account settings, giving you full control over your updates. Stay informed, effortlessly.

- **New** SmartRules Trigger: Topic Level
  - Tailor map behavior with SmartRules at a granular topic level.

- **ENHANCED** Flowcharting
  - Experience enhanced flowcharting in MindManager with improved shape and text management capabilities. Enjoy more screen space and reduced time spent on formatting, as text now automatically adjusts to fit within designated containers. This enhancement helps streamline flowcharting in MindManager for a modernized experience, ensuring consistency throughout your work.

- **ENHANCED** Relationship and dependency routing
  - Default relationship lines have been intelligently redesigned for visual clarity, guiding you effortlessly through your map's connections and enhancing its visual appeal. With this update, routing follows the shortest logical path to its destination and minimizes crossover with other relationship lines.

- Professional templates in more languages.
  - Access a diverse range of professional templates now localized in Chinese, Japanese, and Dutch.
WHAT’S NEW & ENHANCED IN MINDMANAGER 23

- Professional templates, previously available in MindManager Cloud, are now available in MindManager Windows. This will ensure greater consistency across the MindManager portfolio and a more modern user experience.
- Task and project management enhancements. Multiple features have been added to expand the capabilities available to project managers, such as the ability to clearly highlight connected relationships and dependencies.
  - Users can track predecessors and successors by isolating only the inbound and outbound relationships or dependency lines tied to specific topics or tasks, as well as highlighting specified flows within flowcharts.
  - Users can now import holidays from .csv and Excel files. This can be done either at the application level, or per map to specify non-working days. This provides better control over resource allocation for project managers.
  - Resource report enhancement to Gantt Chart Pro. Project managers can now easily export a report to Excel that shows on which weeks or days specific resources will be needed, making it easier to schedule resources into a project.
- Pasting links into MindManager is now automated. When a link is copied to the clipboard and then pasted into a topic in MindManager, it will automatically be interpreted as a topic link. This makes it easier to link to external resources or other topics within MindManager maps. If a paragraph of text contains one or more links, MindManager will also automatically recognize them and add it as a topic link or links. This can be a useful way to quickly add multiple links to your map without having to manually add each one.
- Improved co-editing: It’s now easier to start a co-editing session from a locally stored file.
- Custom icons are now larger and easier to see. Both the window and icons are larger, improving usability of icons.
• Places (cloud storage providers): Places set up by the user in previous versions of MindManager are now carried over when upgrading to the latest version.

• Power filters: Queries now allow users to set fade or hide preferences. Now when subsequent queries are performed, users can select from a list of saved queries.
RESOLVED ISSUES IN MINDMANAGER 23 23.1.240
