WHAT'S NEW & ENHANCED IN MINDMANAGER 24.0

- **NEW** macOS 15 Sequoia Support
- **NEW** Export and Publish Gantt Charts.
- **NEW** MindManager Files

MindManager has introduced integrated cloud file storage for saved maps, streamlining the process of saving and sharing files. The need for third-party storage is eliminated, and the co-editing experience is enhanced. Sharing maps for simultaneous and asynchronous collaboration is now achieved with a few clicks. All files originating from MindManager Web and MindManager Chromebook are automatically stored in the designated "MindManager Files" location.

- **NEW** Sticky note topics.
 - The addition of new sticky note topics offers customers a fresh way to visualize ideas and invigorates brainstorming. It enables seamless collaboration for both simultaneous and asynchronous teamwork. Users can easily retain their preferred sticky note styles and formatting for future use. Additionally, whiteboarding templates now feature sticky note topics as the default option when suitable.
- **NEW** Whiteboard template
 - Collaborate in real-time or asynchronously across an expansive canvas. Brainstorm and plan with sticky note topics. Convert sticky notes into tasks with due dates and assignees. Combine diverse diagram types. Attach files, links, icons, images, and tags to enhance your workspace.

- **ENHANCED** Flowcharting
 - Experience enhanced flowcharting in MindManager with improved shape and text management capabilities. Enjoy more screen space and reduced time spent on formatting, as text now automatically adjusts to fit within designated containers. This enhancement helps streamline flowcharting in MindManager for a modernized experience, ensuring consistency throughout your work.
- Professional templates, previously available in MindManager Cloud and Windows, are now available in MindManager Mac. This will ensure greater consistency across the MindManager portfolio and a more modern user experience.
