

MindManager Mac 26 Release Notes

October 14th, 2026

WHAT'S NEW & ENHANCED IN MINDMANAGER 26.0

- **macOS Golden Gate support**

MindManager Mac 26 has been fully tested and optimized for macOS 27 Golden Gate, ensuring a smooth upgrade experience and continued reliability across your workflows.

- **New shapes for process mapping and BPMN**

Create BPMN diagrams and process maps directly in MindManager with new, ready-to-use shape libraries included in this release. Use standard process and BPMN shapes to map workflows, connect process steps, and document how work moves from one stage to the next.

- **SVG support for greater visual customization**

Import your own SVG graphics and use them as topic shapes, topic images, or background images. Add custom visual elements to maps while preserving sharp, scalable graphics at any size.

- **New map templates for planning and project work**

Start from a ready-made structure instead of a blank map. Eleven new templates are included: Basic Roadmap, Whiteboard Roadmap, Standup Meeting Template, Quick Brainstorming, Quick Brainstorming Board, Risk Register, Global Pipeline Map, Work Breakdown Structure, RACI Matrix, Project KPIs, and Project Dashboard Map.

- **Topic author details**

Users can now filter map contents and hide/show topic information based on topic author details. This allows for viewing when a topic was created, who created it, when it was last modified, and who last modified it. This capability fosters improved collaboration and enhances decision-making processes by ensuring clarity in the project management workflow.

RESOLVED ISSUES IN MINDMANAGER 26.0.111

Resolved defects are documented in the Published Map here:
