WHAT'S NEW & ENHANCED IN MINDMANAGER 26

- **New shapes for process mapping and BPMN**

Create BPMN diagrams and process maps directly in MindManager with new, ready-to-use shape libraries included in this release. Use standard process and BPMN shapes to map workflows, connect process steps, and document how work moves from one stage to the next.

- **SVG support for greater visual customization**

Import your own SVG graphics and use them as topic shapes, topic images, or background images. Add custom visual elements to maps while preserving sharp, scalable graphics at any size.

- **New map templates for planning and project work**

Start from a ready-made structure instead of a blank map. Eleven new templates are included: Basic Roadmap, Whiteboard Roadmap, Standup Meeting Template, Quick Brainstorming, Quick Brainstorming Board, Risk Register, Global Pipeline Map, Work Breakdown Structure, RACI Matrix, Project KPIs, and Project Dashboard Map.

- **Simplified map sharing in the Microsoft 365 file handler.** When an administrator installs the MindManager file handler into the organization's Microsoft 365 tenant, anyone can open maps stored in SharePoint, OneDrive, or Microsoft Teams right where they're saved. Maps open read-only in the MindManager HTML5 client and a license to preview a map is not required. To edit, licensed users can open the map in the MindManager web or desktop apps.

- **Shared cloud template repository (Custom Content Locations).** Open MindManager templates from OneDrive or SharePoint and save them back there. A template in a shared location only has to be created once, and then the whole team can use it, so everyone starts from the same approved structure.

RESOLVED ISSUES IN MINDMANAGER 26.0.208

Resolved defects are documented in the Published Map here:
