

Downloading and installing MindManager 26 (subscription customers)

Available October 14, 2026. If you have an active subscription, you can download MindManager 26 for Windows or Mac from the MindManager Product Download Library from that date.

Before you start

- Make sure your subscription is active and you know the email address of the MindManager account your license is assigned to.
- Check that your computer meets the MindManager 26 system requirements. The Download Library links to them.
- On Windows, you need administrator rights to install.

1. Download the installer

1. Go to the MindManager Product Download Library at <https://www.mindmanager.com/getstarted/>
2. Sign in with your MindManager account.
3. Pick **MindManager 26 for Windows** or **MindManager 26 for Mac**.
4. On Windows, choose the 64-bit installer unless your IT team tells you to use 32-bit.
5. The release notes and user guide are on the same page if you want them.

2. Install

- **Windows:** Run the downloaded .exe, accept the license agreement, and follow the steps in the setup wizard.
- **Mac:** Open the downloaded .dmg, drag MindManager into your **Applications** folder, then start it from there.

3. Activate

1. Open MindManager 26 and click **Sign In**.
2. Enter the email address and password of the account your subscription belongs to. Your subscription license is picked up automatically.
3. If you don't have an account yet, click **Create Account**. Then confirm your address using the email sent from noreply@mindmanager.com.
4. If you see "You do not have a license for this product," click **Enter License Key** and type in the key from your subscription confirmation.

Need help? Organizations rolling it out to many users can find deployment guides under Administrator resources in the Download Library. For problems installing or activating, contact [MindManager Support](#).
