MINDMANAGER BROWSER VIEWING APPLICATION VERSION 4.2

General Information

- The MindManager Browser Viewing Application leverages the rich interactive format available in MindManager. Experience mmap files as animated presentations, expand and collapse branches, view rich content like notes, attachments, links, comments, and more (see the Supported features section for more info).
- The MindManager Browser Viewing Application is responsible for map rendering and viewing functionality in the following MindManager products: Publishing, HTML5 Export, Co-Editing, The MindManager App for Microsoft Teams, The MindManager Go Mobile Apps, The MindManager Reader application, The MindManager Viewer App for SharePoint, and The MindManager Viewer for Google Drive.
- The user interface supports English, French, German, Russian, Simplified Chinese, Japanese, Dutch and Spanish. The language will be selected based on the system's language settings. Map content will appear in the language used to create it.

New in Version 4.2

Version 4.2 contains support for additional new features, quality of life improvements, and bug fixes.

- Tag View
 - Tag view is now available enabling you to view topics in columns organized by their tags.
 - Simply click the “Menu” button, choose “Tag View,” then select a Tag group.
 - Files exported or published in Tag View in the desktop application will automatically load in Tag View.
- Additional support for advanced features
 - Task info references in formulas
 - Filter recalculation settings
- New advanced display options (available as advanced options now for published maps and available for HTML5 export after the next Windows desktop app update)
 - Auto-fit map on load
 - Change link behavior so that clicking anywhere on the topic opens the link (Applies to topics with one link only)
- Right-click and hold to pan map
- For more details on the new features supported see **Supported Features**
