MindManager Go Mobile Application Version 1.2

General Information

- MindManager Go lets you view and navigate your MindManager files on your mobile device. See map details with crystal clarity and focus on important information with ease thanks to powerful filtering and search capabilities.
- Send images and text notes to your MindManager desktop with the NEW MindManager Snap capture tool.
- Supports classic and recent MindManager features including task information, properties, formulas, SmartRules, objects, flowcharts and more (see the Supported features section for more info).
- The user interface supports English, French, German, Russian, Simplified Chinese, Japanese, Dutch and Spanish. The language will be selected based on the device's language settings. Map content will appear in the language used to create it.
- The iOS app is available for download through the Apple App Store.
- The Android app is available for download through the Google Play store.

New in Version 1.2

Version 1.2 contains additional new features, quality of life improvements, and bug fixes.

- Tag View
    - Tag view is now available enabling you to view topics in columns organized by their tags.
    - Simply click the "Menu" button, choose "Tag View," then select a Tag group.
    - Files exported or published in Tag View in the desktop application will automatically load in Tag View.
- MindManager Snap integrated into mobile browsers
    - While viewing a page in the mobile browser users can now send the page as a link to their MindManager Snap queue.
- Improved file browser UI now only shows cloud storage locations that have been added.
- Bug Fixes

Workaround:	Drag scroll bar instead.

Issue:	The inspector tabs are truncated and behave poorly when a topic with every type of content is selected.
Workaround:	None at this time.

Issue:	The camera & photo access request messages are not localized (iOS only).
Workaround:	None at this time.

Issue:	In some cases switching saved filters on and off in the filter panel can cause the app to become unresponsive for some time.
Workaround:	Use the Filter On/Off overlay to turn saved filters off and/or wait until app becomes responsive again (20-40 seconds).

Issue:	Using MindManager Snap without an internet connection or when the internet fails results in losing the sent content.
Workaround:	Ensure there is an active internet connection before sending.

KNOWN FILE BROWSER ISSUES IN VERSION 1.2

Issue:	Cloud storage locations show all available storage locations for the signed in user instead of a single location (EG multiple sites for SharePoint, all team and personal drives for Google Drive)
Workaround:	Select the desired location from the list to continue.
